

# App Selection Criteria

from the APPitic App Lists for Education Website

## Understanding

Apps that fit into this "understanding" stage provide opportunities for students to explain ideas or concepts. Understanding apps step away from the selection of a "right" answer and introduce a more open-ended format for students to summarize content and translate meaning.

### Understanding Criteria

## Remembering

Apps that fit into the "remembering" stage improve the user's ability to define terms, identify facts, and recall and locate information. Many educational apps fall into the "remembering" phase of learning. They ask users to select an answer out of a line-up, find matches, and sequence content or input answers

### Remembering Criteria

## Applying

Apps that fit into the applying stage provide opportunities for students to demonstrate their ability to implement learned procedures and methods. They also highlight the ability to apply concepts in unfamiliar circumstances.

### Applying Criteria

## Analyzing

Apps that fit into the "analyzing" stage improve the user's ability to differentiate between the relevant and irrelevant, determine relationships, and recognize the organization of content..

### Analyzing Criteria

## Evaluating

Apps that fit into the "evaluating" stage improve the user's ability to judge material or methods based on criteria set by themselves or external sources. They help students judge content reliability, accuracy, quality, effectiveness, and reach informed decisions.

### Evaluating Criteria

## Creating

Apps that fit into the "creating" stage provide opportunities for students generate ideas, design plans, and produce products.

### Creating Criteria

# The Padagogy Wheel V4.0

How to use the Padagogy Wheel:  
It's All About Grey-matter Grids

A methodology to get the best results with this teaching model

<http://appitic.com>

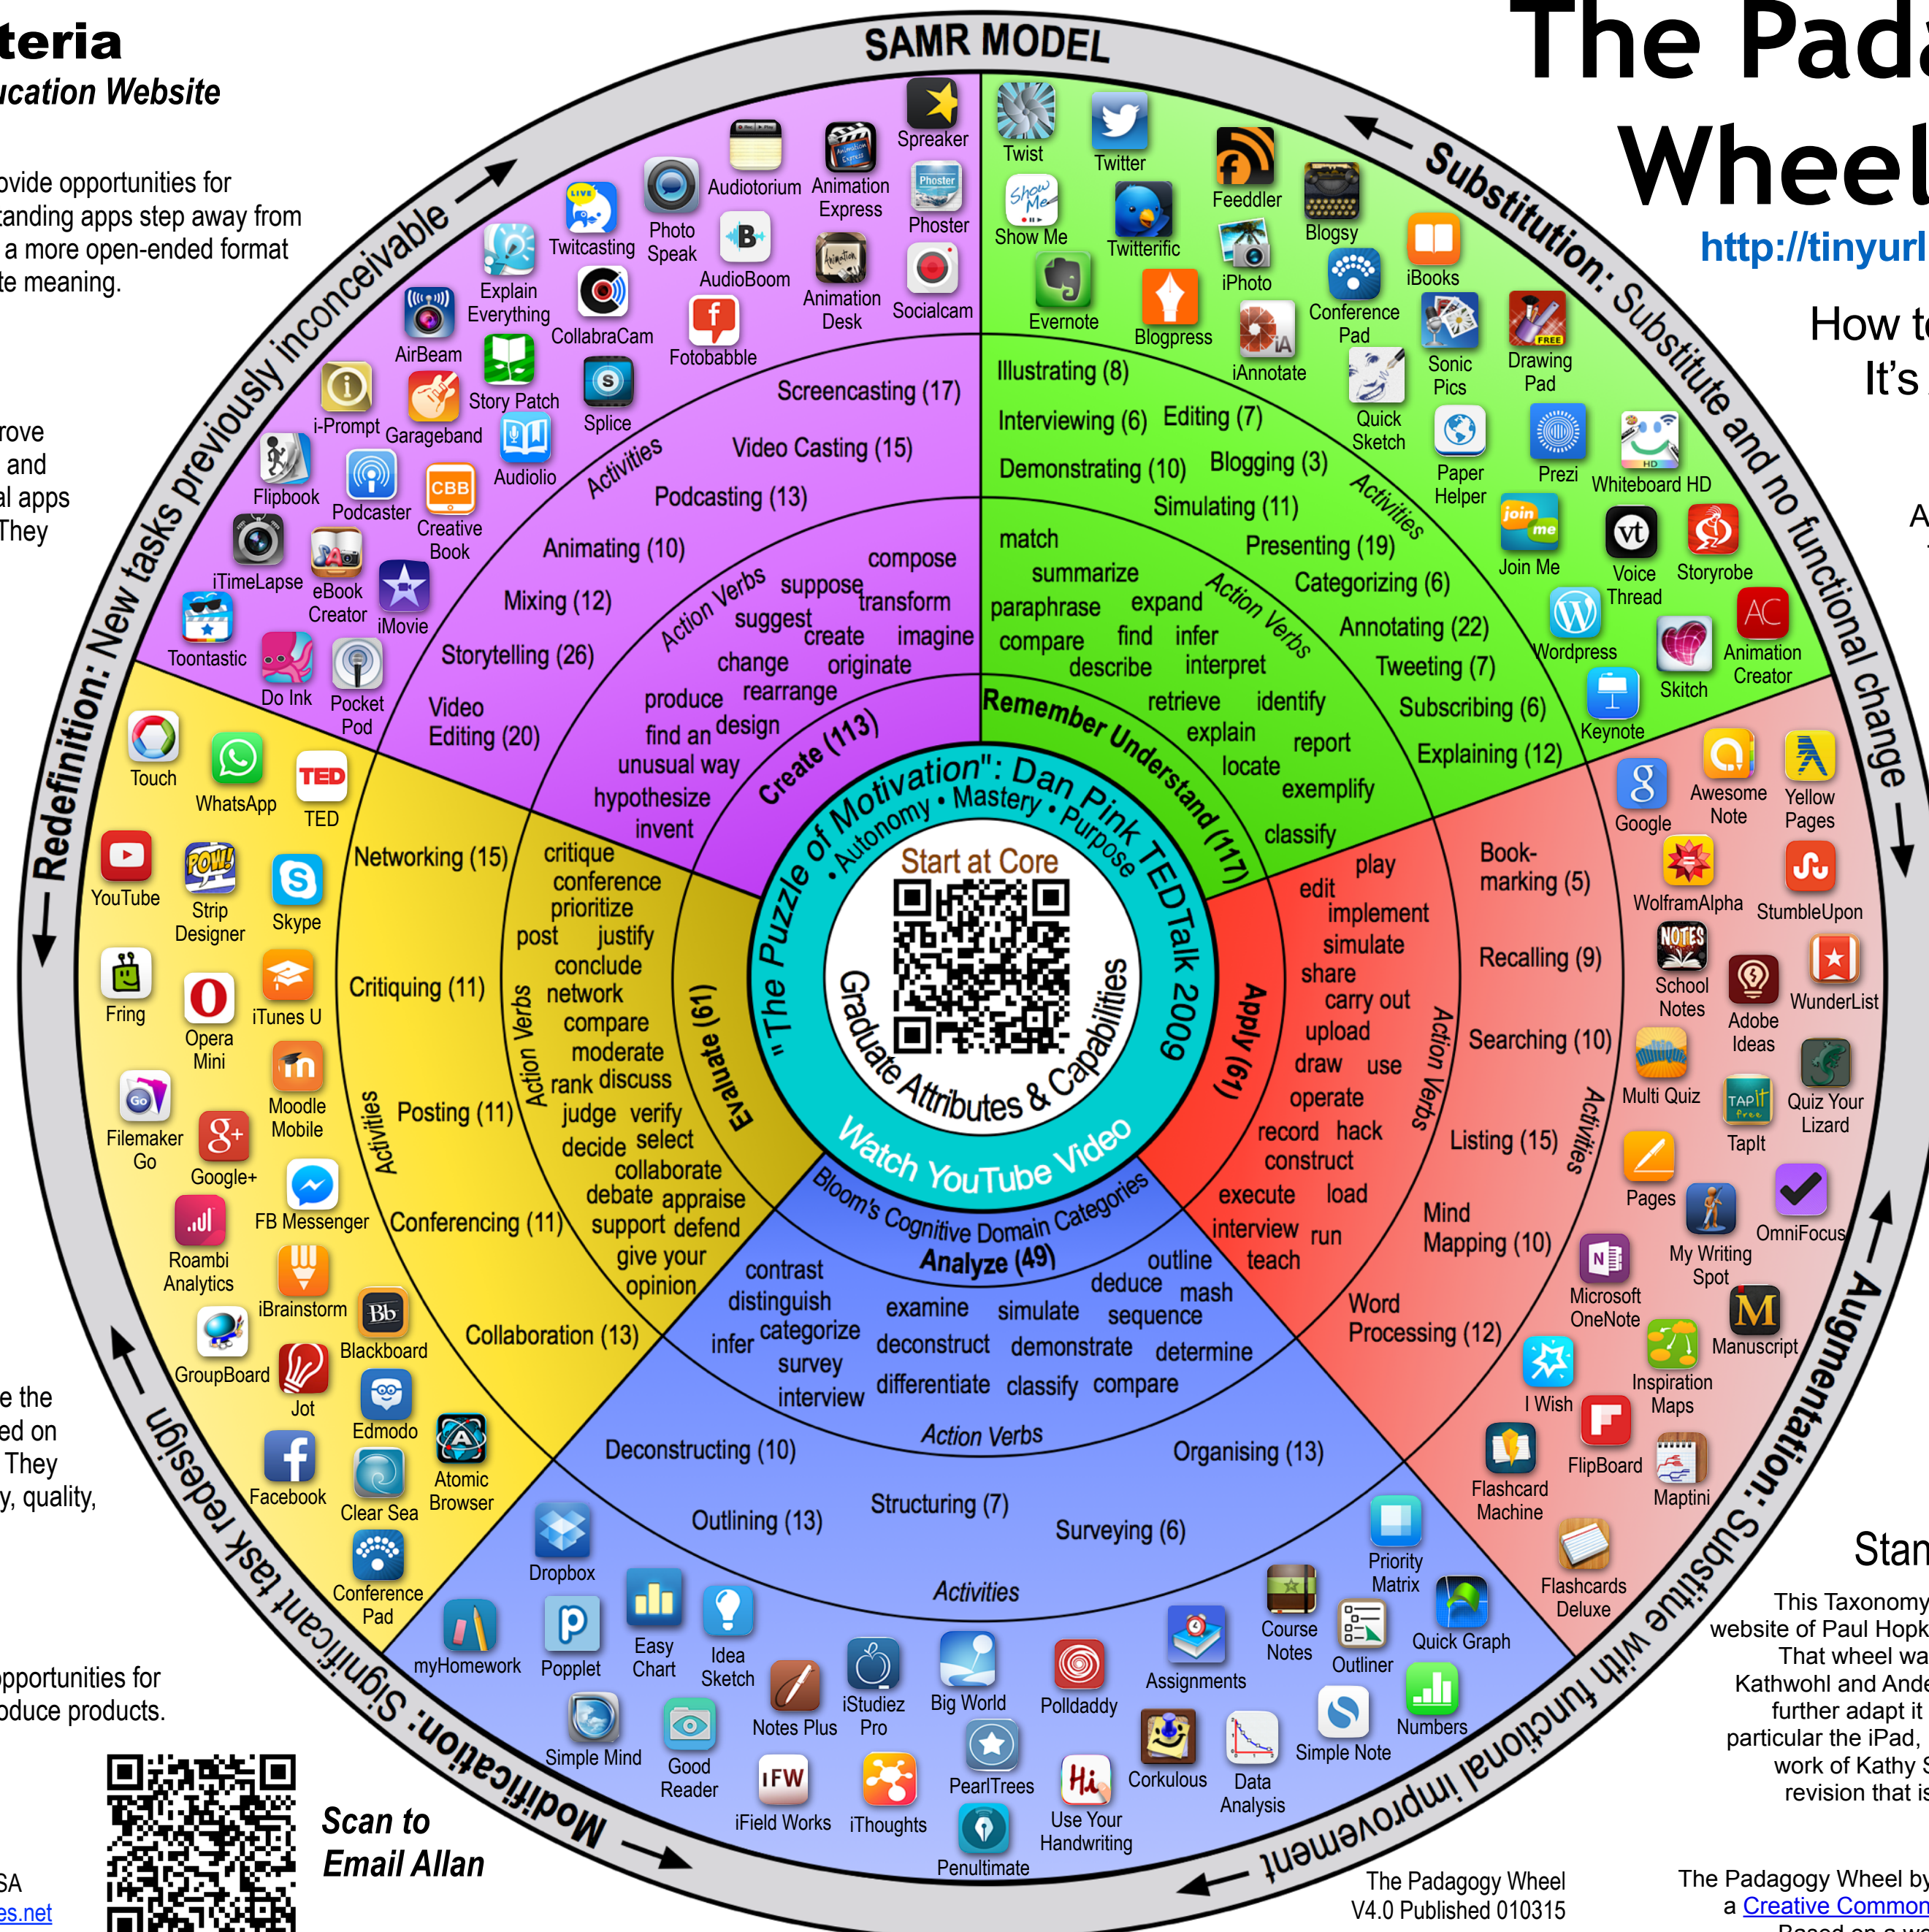

is a comprehensive online directory of apps for education, developed by Apple Distinguished Educators (ADEs) and is available in 19 languages. The website identifies 400 Apps by the Blooms Cognitive Domain Categories with 122 of the most popular apps individually linked from the Padagogy Wheel

## Standing on the Shoulders of Giants

This Taxonomy wheel, without the apps, was first discovered on the website of Paul Hopkin's educational consultancy website [mmiweb.org.uk](http://mmiweb.org.uk). That wheel was produced by Sharon Artley and was an adaption of Kathwohl and Anderson's (2001) adaption of Bloom (1956). The idea to further adapt it for the pedagogy possibilities with mobile devices, in particular the iPad, For V2.0 an V3.0 I have to acknowledge the creative work of Kathy Schrock on her website [Bloomin' Apps](http://Bloomin' Apps). For the major revision that is V4.0 I have to thank the team of ADEs who created [APPitic the App Lists for Education Website](http://APPitic the App Lists for Education Website).
