

COST EFFECTIVE

Benefits

INVEST TODAY, SAVE TOMORROW

High quality materials

Our new PE & Sport kits are designed with the latest fabric technologies, ensuring both durability and comfort. Fabrics are snag-resistant, fade-resistant, and anti-microbial, which helps prevent odors and prolongs the lifespan of the apparel. The materials also incorporate moisture-wicking and quick-drying features to keep students comfortable. This higher quality reduces the need for frequent replacements, saving costs in the long term while also contributing to sustainability through fewer purchases and less waste

Designs here to stay!

By maintaining the same kit design for a minimum of five years, this helps families avoid the need to constantly update uniforms. This consistency ensures that kits can be used across multiple seasons and activities, one key example being the multi sport top for U12 and U14 teams, buy one and wear it for four seasons! This approach not only supports financial savings but also strengthens the school's commitment to reducing its environmental footprint.

Second hand sales

The emphasis on durable, long lasting materials is designed to support a growing second hand market at the school over the coming years. Parents can benefit from high-quality, previously-owned kits that still meet the school's design standards. With the Circular Sustainability Programme in place, old uniforms will be recycled or repurposed when no longer in use. This system creates a sustainable cycle, allowing families to save money while reducing waste and supporting the school's eco-friendly initiatives.
