(Optional) Please use the space below to send us your questions, concerns or topics you would like to be addressed in this and/or future workshops.
I would like some advise and guidance as to how best we can prepare / update our children (and ourselves) on the use of AI in learnings today and the future to come - IGCSE/ IB.
Use of school apps and extra resources to support learning at home
How to use seesaw to view, edit and communicate. Thanks!

AI Initiative

Understanding the Impact of AI on Our Kids

Artificial intelligence (AI) is predicted to be the largest disruptive change we will experience in our lifetimes—even more significant than the internet. And while AI has the potential to provide enormous benefit, without the widespread adoption of responsible AI practices, it is equally capable of causing harm.

These powerful technologies are not new, but the sudden explosion of AI in our lives has brought with it more questions than answers. What exactly is this technology? What can it do? What can't it do? And, importantly, what ***shouldn't*** it do? In this rapidly changing environment, Common Sense is committed to creating clarity, trust, and understanding through our AI initiatives—including AI product ratings & reviews, AI literacy curricula, original research, and more.
